

Neighbourhood Plan Questionnaire Interim Report

The full report on the results of the recent Neighbourhood Plan Questionnaire will be published as soon as the numerous comments made on the returned Questionnaires, and in some cases their attached sheets, have been analysed and summarised. In the meantime, it can be reported that a total of 417 Questionnaires were completed and returned, representing almost 41% of the 1026 delivered to Newick households. 377 households took the opportunity to show whether or not they supported the Parish Council’s Sustainability Objectives, and over 95% of these confirmed their support; thus use of these objectives by the Neighbourhood Plan Steering Group for determining which sites are most sustainable has strong public support.

In addition to using the Sustainability Objectives to test each site, account will be taken of the views expressed by those households that completed questionnaires. The chart below shows the results of the Questionnaire voting for and against each of the twelve potential development sites. The map overleaf is added as a reminder of the position of each site
